PROFILE

I'm a front-end developer with 5 years of commercial experience, specializing in HTML, CSS, and JavaScript. I have strong experience building responsive and editable websites using WordPress and HubSpot, with a focus on clean, maintainable code and good UX.

I also have experience developing cross-platform email templates, which helped me build a solid understanding of layout consistency and responsiveness across different environments.

Currently, I'm actively improving my skills in React and TypeScript, aiming to grow as a modern front-end developer and work on more dynamic, data-driven applications.

I'm open to new challenges and opportunities where I can continue to grow and contribute..

EDUCATION

Kharkiv National University of Radio Electronics, 2017 – 2021

Faculty – Computer Science • Specialty – Computer Science

EXPERIENCE

WeCodeEmail, Front-end Developer
May 2021 – present

- Developed email templates, landing pages, and marketing banners using HTML, CSS, and JavaScript
- Created responsive and cross-browser-compatible layouts + Pixel-Perfect
- Maintained and customized websites in CRM platforms such as HubSpot, Marketo, Pardot, and WordPress
- Built a custom WordPress page from scratch, ensuring easy content updates
- Participated in the development of a real estate-focused web application (social platform), using VanillaJS

Freelance, Front-end Developer
2024 – present
